HIBA V S

Data Scientist / ML Engineer

Thrissur, Kerala, India

+91-6235899239 hibasareef@gmail.com portfolio LinkedIn GitHub

Summary

Motivated 3rd-year Computer Science & Engineering student specializing in Data Science with hands-on experience in building and deploying real-time AI applications. Combines a strong foundation in Python, Computer Vision, and Deep Learning with a passion for Explainable AI, predictive modeling, and designing systems that are accurate and interpretable. Seeking internship and entry-level opportunities in Machine Learning and Data Science to contribute to impactful projects.

Skills

Languages: Python (Advanced), SQL, HTML, JavaScript/TypeScript (Basic).
Machine Learning & AI: Scikit-learn, Pandas, NumPy, SciPy, SHAP, Model Evaluation, Predictive Modeling
Computer Vision: OpenCV, MediaPipe, CNN (MobileNetV2), Transfer Learning, Real-time Inference
Web Development: React, Next.js, Tailwind CSS
Tools & Deployment: Git, GitHub, Vercel, PostgreSQL, MLOps
Analytical Skills: EDA, Data Cleaning, Statistical Analysis

Projects

StyleSense AI: Personal Fashion Intelligence System | *Python, Computer Vision, Multi-modal AI* **Mar 2026 – Present**

- Developing a multi-modal AI system for personalized fashion recommendations based on body shape, skin tone, and context.
- Built a computer vision pipeline using MediaPipe to extract body features for intelligent outfit suggestions.
- Designing an AI-driven recommendation engine combining image understanding with contextual reasoning.
- Exploring generative AI for virtual try-on using diffusion-based models.

FaceGuard: Real-Time Deepfake Detection | *Python, Deep Learning, Computer Vision* **July 2025 – Feb 2026**

- Developed a real-time deepfake detection system for images, videos, and live webcam streams.
- Built a MobileNetV2-based model using transfer learning on FaceForensics++ for efficient classification.
- Implemented MediaPipe-based facial ROI extraction to improve detection sensitivity.
- Designed temporal smoothing to stabilize predictions and reduce false positives in video streams.

AirChalk: Gesture-Based AI Drawing System | *Python, OpenCV, MediaPipe* **Apr 2025 – July 2025**

- Designed a touchless drawing system using real-time hand tracking and gesture recognition.
- Implemented AI-based object recognition to transform sketches into animated entities.

Text-to-Music Converter | *Python, Audio Synthesis* **Jan 2025 – Mar 2025**

- Built an application converting text into musical compositions using algorithmic mapping.
- Implemented real-time playback with synchronized animations.

Certifications

- AI for Students: Build Your Own Generative AI Model – NxtWave (2025)
- Introduction to Data Science – Simplilearn (2025)
- Learning Java – Infosys Springboard (2024)
- Cybersecurity Terminology – LinkedIn Learning (2024)

Education

B.Tech Computer Science & Engineering (Data Science) **2023 – 2027**
APJ Abdul Kalam Technological University, IES College of Engineering *CGPA: 8.03 / 10*
